CHARMAE M. COSTELO

Aspiring Software Developer

0915 394 6164 | charmaecostelo11@gmail.com

PROFESSIONAL SUMMARY

BS Computer Science student at Biliran Province State University seeking a Software Developer role. Enjoys solving problems through code and turning ideas into working apps and websites. Built a CNN-based mobile app that classifies sweet potato varieties from leaf images, and a website for a pizza house. Skilled in Python, JavaScript, HTML and CSS, and responsive web design.

EDUCATION

Bachelor of Science in Computer Science
Biliran Province State University

SKILLS

- **Programming:** Python, JavaScript, HTML & CSS
- **Machine Learning:** Convolutional Neural Networks (CNN), Image Classification
- **Web:** Responsive Web Design, Basic UI/UX Design
- **Soft Skills:** Problem-Solving, Teamwork

PROJECTS

CamoteLens | Sweet Potato Variety Classification Through Leaf Image Analysis Using CNNs

- Developed an image-based mobile app that identifies sweet potato (camote) varieties from photos of their leaves.
- Used a Convolutional Neural Network (CNN) to classify the variety and show confidence scores for each class.
- Included camera and gallery capture, cropping, saved history, favorites, and offline records.

Slice and Sip Pizza House | Pizza House Website

- Developed a website showing the pizza house's pizzas, drinks, and other offerings.
- Included a menu, store information, and contact details for customers.
- Designed an admin dashboard for orders, sales, and menu items.
